

AI / ML Engineer

Build production-grade AI systems with LLMs, transformers, and modern ML infrastructure. Translate ambiguous problems into shipped, monitored, and ethically grounded AI applications.

01 CORE ENGINEERING

~

Python & software fundamentals

Strong engineering foundations, clean code, testing discipline

AI

LLM API integration

Hands-on with Anthropic, OpenAI, Google & more

TF

Transformer architectures

Attention mechanisms & model capabilities

DB

Vector DBs & embeddings

Semantic search, retrieval, and RAG patterns

PT

PyTorch, TensorFlow & HF

Fluent across the modern ML ecosystem

<>

Prompt engineering

In-context learning & structured prompting

02 PRODUCTION & INFRASTRUCTURE

Op

MLOps practices

Versioning, monitoring, and deployment

CL

Cloud & containers

AWS, GCP, Azure · Docker, Kubernetes

03 MINDSET

Safety & alignment

Ethical considerations woven into every system

Problem solving

Comfortable with ambiguous requirements

Communication

Explain complex AI to any stakeholder

04 REQUIREMENTS

- Bachelor's or Master's degree in Computer Science, AI/ML, or equivalent practical experience
- Proficiency of Python development experience with strong software engineering fundamentals
- Hands-on experience building applications with LLM APIs (OpenAI, Anthropic, Google, etc.)
- Deep understanding of transformer architectures, attention mechanisms, and model capabilities
- Experience with vector databases and embedding models for semantic search
- Proficiency with ML frameworks (PyTorch, TensorFlow) and Hugging Face ecosystem
- Strong knowledge of prompt engineering techniques and in-context learning
- Experience with MLOps practices including model versioning, monitoring, and deployment
- Familiarity with cloud platforms (AWS, GCP, Azure) and containerization (Docker, Kubernetes)
- Understanding of AI safety, alignment, and ethical considerations
- Excellent problem-solving skills and ability to work with ambiguous requirements

- Strong communication skills to explain complex AI concepts to various stakeholders
